DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to semi-conductor light emitting apparatus, classified in Class 257, Subclass 98.
 - II. Claim 12-20, drawn to a light emitting apparatus including a power supply and a plurality of optical systems, classified in Class 362, Subclass 311.
 - III. Claims 21-23, drawn to a method of making a light emitting apparatus, classified in Class 29, Subclass 592.1.
 - IV. Claims 24-25, drawn to a light emitting apparatus including a power supply and an optical system having light-guiding and reflecting portions, classified in Class 362, Subclass 307.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III, and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions include the specifics of a semi-conductor light device including a phosphor layer (Invention I), a light emitting apparatus having a plurality of optical systems (Invention II), a method of making a light emitting apparatus (Invention III), and a light emitting apparatus incorporating light-guiding and reflecting portions (Invention IV). The specifics of the abovementioned inventions may

provide for different optical effects or operation for illumination with the exception of Invention III, which is drawn to a method of forming.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Conclusion

The separate inventions, as described above, would require multiple and distinct searches, thus, placing an unnecessary burden on the examiner. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason M. Han whose telephone number is (571) 272-2207. The examiner can normally be reached on 8:00am-5:00pm.
